AMAFERM PRODUCTS

V.F. PRO-GEST

A loose meal form of Amaferm®, blended with yeast and a distillers grain carrier, for use in any livestock feeding situation where maximum digestive efficiency and nutrient absorption are desired.

BEEF PRODUCTS

V.F. Concept-Aid

A highly fortified vitamin, mineral, organic trace mineral formula specifically designed to target cycling, egg production and conception in cattle. A premier breeding mineral for all breeding age cows, heifers and bulls. Especially beneficial in intensive A.I. and E.T. breeding environments. Excellent for use in bull development programs.

V.F. Concept Aid 0/S

A highly fortified, vitamin, mineral, and organic trace mineral formula specifically designed to target cycling, egg production and conception in cattle. A premier breeding mineral for all breeding age cows, heifers and bulls. Especially beneficial in conventional A.I. and E.T. breeding environments. Excellent for use in bull development programs.

V.F. Concept Aid 5/S

A highly fortified, vitamin, mineral, and organic trace mineral formula specifically designed to target cycling, egg production and conception in cattle. A premier breeding mineral for all breeding age cows, heifers and bulls. Especially beneficial in conventional A.I. and E.T. breeding environments. Excellent for use in bull development programs.

V.F. Concept Aid Cube

A natural (20%) protein cube complete with a highly fortified vitamin, macro and organic trace mineral package specifically designed to target reproductive development and fertility of cows, heifers and bulls. Especially beneficial in intensive A.I., E.T. and bull developing environments.

V.F. Concept-Aid + Mag/S

A highly fortified, vitamin, mineral, and organic trace mineral formula specifically designed to target cycling, egg production and conception in cattle. A premier breeding mineral for all breeding age cows, heifers and bulls. Especially beneficial in conventional A.I. and E.T. breeding environments. Excellent for use in bull development programs. Extra magnesium for deficient areas.

V.F. Co-Products Balancer

A blend of vitamins, minerals and trace minerals specifically formulated to balance the nutrient requirements of cattle being supplemented with co-products (DDGs). Can be fed free choice or mixed in a supplement.

BEEF PRODUCTS Continued

V.F. Cow Calf 5

A highly versatile and palatable, all-purpose free choice mineral for cattle of all ages. Formulated to meet basic nutrient requirements when no known stress factors are present.

V.F. Feedlot Medicated RU 1600

A loose vitamin and mineral mix designed to balance the nutrient requirements of high grain, cattle finishing diets.

V.F. Fescue Fiber Buster – comes with or without medication

A free choice, loose mineral formulated to balance required nutrients lacking in fescue forages and help offset the negative effects of high entophyte fescue.

V.F. Formula

A vitamin and trace mineral premix in loose form designed to complement any existing feeding program. Can be top dressed or mixed in grain ration.

V.F. Grass Enhancer

A free choice, loose mineral formulated to balance nutrients required by cattle grazing pasture and mature forages.

V.F. High Mag

A free choice, loose mineral formulated to balance nutrients not present in lush, rapidly growing grasses.

V.F. Low Phosphorus Optimizer

A free choice, loose mineral formulated to balance nutrients required by cattle grazing pasture and mature forages of good to high quality.

V.F. Milk-N-More – comes with or without medication

Highly palatable, natural 20% protein milk replacer, designed to deliver required levels of vitamins, organic trace minerals and Amaferm for optimized calf development and health. Also contains Apex®, a natural feed additive proven to increase calf performance.

V.F. Pasture Formula

A high-density macro mineral formulation designed for range conditions or where poor pasture conditions exist.

V.F. Power Meal

A natural (25%) protein supplement fortified with a complete vitamin-mineral package in loose meal form. Formulated for cattle where additional protein intake is required. Can be force fed or mixed with salt and offered free choice.

BEEF PRODUCTS continued

V.F. Pow'r Lyk Molasses Tub

A natural (15%) protein molasses tub complete with a full complement of vitamins and minerals for free choice supplementation.

V.F. Sure Start 2

A (23%) pelleted protein supplement designed to be mixed with grain and forage. Formulated with a high concentration of essential vitamins and trace minerals to meet the animal's nutritional needs and help offset the negative effects of stress during weaning, receiving or recovery.

V.F. Sure Start Keg

A self-fed supplement formulated with a high concentration of essential vitamins and trace minerals to meet the animal's nutritional needs and help offset the negative effects of stress during weaning, receiving or recovery. Ingredients are compressed into a 150 lb. biodegradable keg for free choice consumption.

V.F. Sure Start Pac

A complete pelleted premix designed to be mixed with protein, grain and forage. Formulated with a high concentration of essential vitamins and trace minerals to meet the animal's nutritional needs and help offset the negative effects of stress during weaning, receiving, or recovery.

V.F. Vita Grow 32% Natural Protein Pellets

A natural (32%) pelleted protein supplement for growing and finishing cattle.

DAIRY PRODUCTS

V.F. Dairy 12:16

A 12:16 calcium to phosphorus ratio mineral for lactating dairy cows to be mixed in a TMR or grain mix. For use when feeding 25 lbs. or more of legume hay.

V.F. Dairy 18:12

An 18:12 calcium to phosphorous mineral ratio designed for lactating cows consuming between 10 and 20 pounds of alfalfa hay per day.

V.F. Dairy 18:6

An 18:6 calcium to phosphorus ratio mineral for lactating cows, designed to be mixed in a TMR or grain mix for rations utilizing corn or other grain silages at 30 lbs/head/day or more and alfalfa hay at 8 lbs. or less.

V.F. Dairy TMR Mineral

A complete mineral, versatile enough, to meet the mineral and vitamin needs of the lactating cow for a wide variety of feeding programs.

DAIRY PRODUCTS Continued

V.F. Far-Out

Designed to provide far out dry cows with required levels of minerals and vitamins. Feed for the first 45 days of the dry cow period.

V.F. Up-Close

Designed to provide prepartum cows with the correct balance of minerals and vitamins needed for calving and subsequent lactation performance. Begin feeding 2 to 5 weeks prior to calving.

GOAT PRODUCTS

V.F. Goat Keg (50#)

A 20% natural, high-energy free choice protein supplement compressed into a 50 lb. biodegradable keg for free choice consumption.

SHEEP PRODUCTS

V.F. Sheep & Goat Keg

A natural (20%) protein supplement fully fortified with a complete vitamin mineral package. Ingredients are compressed into a 50 lb. or 200 lb. biodegradable keg for free choice consumption. Formulated for both sheep and goats grazing pastures.

EQUINE PRODUCTS

V.F. Sure Balance

A 25% natural protein pellet highly fortified with organic minerals and vitamins for use when mixing your own feed.

Pasture Mate Keg

A free choice keg designed to meet the needs of horses grazing on pasture grasses. Ingredients are compressed into a 50 lb. or 200 lb. biodegradable keg for free choice consumption.

VITA CHARGE

Vita Charge 28 Dispersible Powder

A dispersible powder formulated to be mixed with milk, oral drenches or top dressed on the feed to jumpstart the calves' digestive tract following calving, scours, or tagging.

SILAGE PRODUCTS

Super G-X Silage Preservative

A natural silage preservative recommended for use on corn silage, hayleges and high moisture corn.
